

Leader Board Application – Gillette Pepsi Companies

Gillette Pepsi Companies (GPC) worked with LTC Software Solutions to increase productivity in their warehouse. GPC employees are using integrated digital leader boards created by LTC Software Solutions as a self-motivator. The boards encourage a bit of healthy competition between teammembers and other divisions of GPC. Before the leader boards, one person was barely able to achieve 200 cases per hour at GPC. After the installation of the display boards, the team had six people that were over 200 cases per hour at one time.

The tool also helps management forecast order fulfillment, so they know if staffing levels are optimal on any given day. “It has definitely been a tool that’s been helping the managers manage,” says Joe P., Director of Business Transformation at GPC. The leader boards give real-time visibility to help individuals when they have an issue with a pallet. The manager can ask the individual what happened and provide guidance on what to do in the future. This helps reduce issues and eliminate rework, increasing efficiency and productivity.

The management-facing display board combined with the digital displays that the team can view in the warehouse are simple to read and view information instantly. GPC also appreciates the flexibility and automation in choosing how often the boards refresh and update with the 85-inch digital display solution.

How to Increase Productivity with Custom Programming

Microsoft .NET, SQL Server, and Azure were used to integrate the end-to-end solution from GPC’s ERP system through to the Digital Leader Board. This application provides seamless integration from multiple complex systems to a web application that is displayed on the warehouse floor and on management’s laptops.

About LTC Software Solutions

LTC Software Solutions is a full-service software and web-application development company. We offer both expertise and affordability by utilizing an experienced and talented offshore development team and U.S.-based project management. With our team at your side, you can have a full solution that will positively impact the overall visibility and productivity of your business.
